

MAHAVEER PAPERS

Website Revision Brief

Designer-facing audit and implementation guide

Scope

Brand positioning and narrative
Theme, design and image direction
Homepage and inner-page structure
Catalogue, product and DigiLux improvements
Sustainability, AI and launch-readiness checks

Speciality papers. Beyond ordinary.

Recommended central direction for the Mahaveer Papers website

Strong visual base, but not launch-ready

The current website already has a premium visual foundation and a useful eight-catalogue structure. However, inaccurate positioning, copied sustainability content, template leftovers, incomplete product pages and broken links must be corrected before launch.

The central correction

Mahaveer Papers should not sound like a paper manufacturer. Its strongest position is as a specialist curator, stockist and paper-solutions partner that connects Indian printers, designers, converters and brands with the right global speciality papers, supported by ready stock and practical guidance since 1992.

Recommended master positioning

Speciality papers. Beyond ordinary.

Since 1992, Mahaveer Papers has helped printers, designers, packaging converters and brands choose the right paper for every idea. Explore premium papers from trusted global mills, supported by ready stock and practical print and application guidance.

What the website must communicate within the first screen

- **What Mahaveer sells:** speciality papers and boards for printing, packaging, binding, labels and non-standard applications.
- **Who it serves:** designers, brand owners, printers and publishers, and packaging converters.
- **Why Mahaveer:** experience since 1992, curated global ranges, ready stock, local support and technical guidance.
- **What to do next:** explore papers, request samples, ask a paper specialist or check availability on WhatsApp.

Corrections required before the website goes live

PRIORITY	CURRENT ISSUE	REQUIRED CHANGE
CRITICAL	The website calls Mahaveer a manufacturer and uses lines such as 'precision-made paper products'. The SEO title also says 'Paper Manufacturing & Distribution'.	Position Mahaveer as a speciality-paper merchant, stockist, curator, distributor and solutions partner.
CRITICAL	The About page shows 14+ years even though Mahaveer was established in 1992.	Use 'Since 1992' and '30+ years of speciality-paper expertise'. Remove the unsupported 97% retention figure unless it is documented.
CRITICAL	The About page contains home-renovation template text, Livohaus references, American locations and likely placeholder testimonials.	Remove the full testimonial section until genuine client quotes, projects or approved logos are available.
CRITICAL	The Sustainability page reproduces UPM manufacturing claims, including its Climate Action Roadmap, 2030 emission targets and EUDR statements.	Remove this content. Rebuild the page around Mahaveer's sourcing practices, FSC credentials and verified product-specific environmental information.
CRITICAL	Multiple blog articles, Privacy and Terms pages return 404 errors. Social icons link to '#'.	Publish real pages and social URLs, or hide those links until ready.
HIGH	Product family pages show generic application headings such as 'Packaging' and describe ten shades as '10 Product'.	Use the family name as the main heading and describe the range as shades or stocked variants.
HIGH	Product pages contain only colour, GSM and size, with no decision-making information.	Add brand, mill, SKU, finish, printing, finishing, applications, certifications, sample request, stock enquiry and technical downloads.
HIGH	The DigiLux applications section repeats 'Visiting Cards' twelve times and contains visible asterisks and copy errors.	Replace with distinct applications and complete the DigiLux range, specifications and sample-pack journey.

Important credibility note

Claims about climate targets, forestry operations, manufacturing energy, EUDR compliance or carbon reduction must not be presented as Mahaveer's own unless Mahaveer can substantiate them. Mill-level claims should be clearly attributed to the relevant mill and product.

Recommended theme and design direction

Keep

- Deep navy, black, orange and white as the core Mahaveer palette.
- The elegant serif and modern sans-serif combination.
- The premium, editorial tone and clean rounded buttons.
- The eight catalogue books as the main discovery structure.

Change

- Use warm ivory or soft white as the dominant background; the site is currently too dark and industrial.
- Use orange only as a controlled accent for CTAs, highlights and active states.
- Reduce italic typography to hero headlines and selected highlights.
- Increase the logo size and give the identity more visual authority.

Photography direction

50%	Tactile macro photography	Surface grain, felt marks, metallic sheen, inclusions, embossing, thickness and sheet edges.
30%	Finished applications	Rigid boxes, mono cartons, wedding invitations, garment tags, labels, brochures, books and corporate stationery.
20%	People and heritage	Founders, team, warehouse, catalogues, customer consultation and the journey since 1992.

Avoid

- Generic industrial or sustainability stock photography that is not connected to paper.
- Large dark hero images repeated on every inner page.
- Flat colour rectangles as the only product visual; show paper edge, texture, scale and applications.
- Decorative movement that delays product discovery or makes the website feel like a portfolio instead of a useful B2B tool.

Catalogue colour system

Retain one Mahaveer master design system, but assign each catalogue book a controlled accent colour. Use that accent for numbering, category markers, filters and page navigation - not as a completely separate website theme.

Recommended content hierarchy

#	SECTION	PURPOSE
01	Hero	State speciality papers, Beyond Ordinary, since 1992 and the core audiences. Use Explore Papers and Ask a Paper Specialist.
02	Trust strip	Since 1992 Bengaluru and Ahmedabad Ready stock Trusted global mills DigiLux low MOQ.
03	Find your paper	Search by application, paper type, colour, GSM and printing method.
04	Eight catalogues	Spectrum, Textures, Black & Kraft, Earth, Gloss & Metallic, Coverings, Speciality and Core Board.
05	Explore by application	Rigid boxes, mono cartons, invitations, tags, digital print, binding, labels and speciality uses.
06	Who we serve	Designers, brand owners, printers and publishers, and packaging converters.
07	Why Mahaveer	Selection guidance, global sourcing, ready stock, low-MOQ options and dependable supply.
08	Featured mills and brands	Feature Favini prominently while keeping Mahaveer as the main identity and solution partner.
09	DigiLux spotlight	13 x 19 inch digital media, 100-sheet packs, low MOQ, ready stock and sample pack.
10	Sustainability proof	Verified certifications, recycled and alternative-fibre ranges, plus product-specific credentials.
11	Real work and insights	Applications, customer projects, print inspiration and useful technical articles.
12	Conversion section	Request swatches, check stock, contact sales or use the paper assistant.

Recommended hero copy

Speciality papers. Beyond ordinary.

Since 1992, Mahaveer Papers has helped printers, designers, packaging converters and brands choose the right paper for every idea. Explore premium papers from trusted global mills, supported by ready stock and practical print and application guidance.

Primary CTA: Explore Papers **Secondary CTA:** Ask a Paper Specialist

CTA language to replace

CURRENT	USE INSTEAD
Book Now	Speak to a Paper Specialist
Request Free Quote	Check Price & Availability
Contact Us	Request Samples / WhatsApp Sales

Rebuild product pages around customer decisions

The existing product family pages are visually clean but too shallow. They display colour, GSM and size without explaining what the paper is, how it prints, what finishing is suitable, where it can be used or how the buyer can request a sample. The repeated generic Products hero also pushes useful information below the fold.

Recommended product-detail structure

1	Product identity Product name, brand or mill, catalogue, surface and a clear one-line promise.
2	Visual gallery Real swatches, sheet edges, texture close-ups, printed results and finished applications.
3	Stocked variants Shade, SKU, GSM, size, thickness or micron and pack quantity where relevant.
4	Printing Offset, screen, toner digital, HP Indigo, inkjet or testing requirement - based only on verified data.
5	Finishing Foiling, embossing, debossing, die cutting, punching and laser suitability.
6	Spot UV warning Clearly state: Spot UV is not recommended on Mahaveer paper ranges.
7	Applications Primary and secondary applications, shown in plain customer-friendly language.
8	Sustainability FSC, recycled content, alternative fibre, recyclability and biodegradability with exceptions.
9	Action Check availability, request sample, WhatsApp sales and download catalogue or technical sheet.
10	Alternatives Related shades, value alternatives, premium upgrades and similar products.

Filter simplification

Primary filters

- Paper type
- Application
- Colour
- GSM
- Size

Advanced filters

- Printing method
- Brand or mill
- Surface or finish
- Sustainability
- Availability

Use customer language

Do not expose raw database terminology as the first filter. Replace long technical types with simple groups such as Smooth, Textured, Metallic, Recycled/Natural, Covering, Synthetic, Labels and Core Board. Detailed material terms can remain under Advanced Filters.

About, Sustainability, DigiLux, Blog and Contact

About page

- Replace 'Industry that choose us' with 'Industries that trust us' or 'Trusted across print and packaging'.
- Build the story around 1992, the founder, business evolution, global sourcing, ready stock and the Bengaluru-Ahmedabad presence.
- Use a simple timeline and real photography of the team, warehouse, catalogues and customer consultation.
- Remove Livohaus, homeowners, American cities and placeholder customer profiles.
- Use genuine testimonials, client logos or case studies only with approval.

Sustainability page

- Remove UPM's Climate Action Roadmap, 2030 targets, forestry-operation language and EUDR claims.
- Explain how Mahaveer selects responsible mills and verified paper ranges.
- Show FSC certificate details and link each claim to the relevant certificate or mill documentation.
- Separate recycled, alternative-fibre and responsibly sourced ranges.
- Publish recyclability and biodegradability at product level, including the exceptions for NT Matt and Paperlike Synthetic.
- Add a practical explanation of paper, managed forestry, recycling and end-of-life guidance.

DigiLux page

- Correct 'Cromo' to 'Chromo' and 'creates an experiences' to 'creates an experience'.
- Remove visible asterisks around 40 products and 13 x 19 inch.
- Replace the twelve repeated Visiting Cards entries with distinct applications.
- Add real categories: textured boards, metallic boards, white boards, NT sheets, Chromo StayOn, Mirror Coat StayOn, labels and other digital media.
- Clearly show 13 x 19 inch, 100-sheet packs, toner compatibility, low MOQ and ready-stock benefits.
- Make 'Request DigiLux Sample Pack' the primary CTA.

Blog and Contact

- Publish real blog articles before showing them; multiple current article links return 404.
- Replace unrelated imagery, including the food photograph used for a paper-grade article.
- Replace US form examples with Indian names, +91 phone format and Indian city examples.
- Use sales@mahaveerpapers.com as the main professional email; keep the Yahoo address secondary if required.
- Make Mobile/WhatsApp an actual WhatsApp link and add Get Directions buttons for both branches.
- Add enquiry intent: Sample, Stock, Price, Catalogue, Technical Support or Dealership.

Keep the concept, strengthen the technical guardrails

The Paper Assistant is one of the strongest ideas on the website and is already functional. It correctly warns that Spot UV is not recommended. However, recommendation quality must be stricter before the assistant becomes a trusted technical authority.

Recommended assistant flow

STEP	ACTION	REQUIREMENT
1	Clarify	Ask application, printing method, colour, GSM, size and approximate quantity.
2	Match	Separate exact matches from near alternatives and explain the difference.
3	Verify	Use only approved master-database data for printing, finishing, sustainability and dimensions.
4	Show	Return product image, family, shade, SKU, GSM and size with a direct product-page link.
5	Convert	Offer Request Sample, Check Stock and prefilled WhatsApp actions.
6	Protect	Never claim 'perfect match' or 'available' when the requested specification or stock data does not confirm it.

Interface adjustment

Reduce or delay the greeting bubble. It currently appears on every page and overlaps content and calls to action. Keep a compact floating icon, show the greeting once per session and ensure it does not block mobile controls.

Useful suggested prompts

- Paper for a rigid box
- White textured paper for invitations
- Digital media in 13 x 19 inch
- Eco-friendly paper for food packaging
- Black paper suitable for foiling
- I want to request a sample

Specific text and consistency checklist

14+ Years of Experience	Since 1992 / 30+ Years of Expertise
Industry that choose us	Industries that trust us
Book Now	Speak to a Paper Specialist
Request Free Quote	Check Price & Availability / Request Samples
FAQ's	FAQs
Cromo	Chromo
creates an experiences	creates an experience
9 Product / 10 Product	9 products / 10 shades
manufacturing and distribution	speciality-paper sourcing, stocking and distribution
Project Location - California	City - Bengaluru
+1 phone placeholder	+91 phone placeholder

Tone of voice

- **Expert but simple:** explain technical details in language a printer, designer or brand owner can understand.
- **Confident but accurate:** avoid unsupported superlatives, copied mill claims and blanket sustainability statements.
- **Application-led:** explain what the customer can make with each paper, not only how the material is classified.
- **Human and established:** make experience since 1992 visible without sounding old-fashioned.
- **Consistent:** use British English, consistent capitalisation, GSM formatting and singular/plural rules.

Recommended revision sequence and launch checklist

Revision order

STAGE	FOCUS	WORK
PHASE 1	Accuracy and trust	Remove copied/template content, correct positioning and heritage, fix all broken links and false placeholders.
PHASE 2	Core experience	Rewrite the homepage, rebuild product pages, simplify filters and improve image direction.
PHASE 3	Key brand pages	Complete About, Sustainability, DigiLux, Contact and the actual blog articles.
PHASE 4	Conversion	Add sample requests, stock checks, WhatsApp actions, downloads and assistant deep links.
PHASE 5	Quality assurance	Test mobile, accessibility, SEO, forms, analytics, redirects, loading speed and content accuracy.

Pre-launch checklist

- All main navigation, product, blog, Privacy, Terms and social links work.
- Mahaveer is described accurately as a speciality-paper specialist, stockist and distributor.
- Since 1992 and 30+ years are consistent across all pages.
- No Livohaus, homeowner, American-location or other template content remains.
- All sustainability claims are verified and correctly attributed.
- Each product family has a unique heading, description and stocked variants.
- Spot UV is marked as not recommended wherever process suitability is shown.
- DigiLux applications are unique and all product information is complete.
- Forms use Indian placeholders and reach the correct sales recipient.
- WhatsApp links, map directions and sample requests work.
- SEO titles do not claim manufacturing; product titles are not duplicated.
- Every page has an appropriate H1, description, social image and mobile layout.
- Product Assistant answers are checked against the approved master database.
- The greeting bubble does not obstruct desktop or mobile content.

Final design principle

Take inspiration from Favini's confidence, material storytelling, samples and technical depth, but do not make Mahaveer look like a paper mill. Mahaveer's competitive story is global paper knowledge, locally available stock, practical guidance and relationships built since 1992.

Designer handoff

Use this brief as the master revision checklist. Content and data should be checked against the approved Mahaveer product database before publication, especially product specifications, printing suitability, finishing, certifications, recyclability, biodegradability and stock information.
