

REVISED DESIGNER BRIEF

Mahaveer Papers Website: Pending Changes

A focused implementation list covering Favini visibility on the homepage and product catalogue, remaining website corrections, and essential SEO improvements.

Scope confirmed

Favini should be visible on the homepage and inside the product catalogue. A separate Favini landing page and extensive Favini sections on About or Sustainability are not required at this stage.

1. Favini visibility - homepage

Add one premium, compact Favini section after the catalogue families or before DigiLux. Mahaveer Papers must remain the primary brand.

Recommended heading

Premium Papers from Favini, Italy

Recommended copy

Mahaveer Papers offers a curated range of Favini speciality papers. Known for expressive colours, refined textures and innovative surfaces, these papers are suited to premium packaging, print, publishing and creative communication.

Show selected ranges

- Burano
- The Tube
- Sumo
- Prisma
- Twill
- Tradition Valentino Ivory
- Shiro Echo
- Bianco Flash
- Crush
- Influence
- Majestic
- Favini Art Cotton

Homepage actions

- Explore Favini Papers - link to Products with the Favini filter applied.
- Request Favini Swatches - link to the enquiry form.

Visual direction

Use approved Favini product images, colour fans, close paper textures and premium printed or packaging applications. Keep the section clean and editorial. Do not use generic factory photographs that make Mahaveer Papers look like the manufacturer.

Optional trust-strip mention

Since 1992 | Favini Papers | Ready Stock | Bengaluru & Ahmedabad | Samples Available

Brand safeguard

Use wording such as 'selected Favini ranges supplied by Mahaveer Papers'. Do not state exclusive distributor, authorised distributor, official partner or guaranteed availability unless documented and approved.

2. Favini visibility - product catalogue

Favini needs to be discoverable while customers browse products. It does not require a separate website section.

Required changes

- Add Brand as a product filter: Favini, Mahaveer Papers and DigiLux.
- Add a small 'FAVINI | ITALY' label to every verified Favini product card.
- Write product names as 'Burano by Favini', 'Majestic by Favini', 'Prisma by Favini' and similar formats on detail pages.
- Add Request Sample and Check Price & Availability actions to Favini products.
- Show FSC, recycled-content and alternative-fibre information product by product - never as a blanket Favini claim.
- Use the verified master database for brand names, GSM, sizes, printing, finishing, applications and certifications.

Product card	Recommended presentation
Burano	FAVINI ITALY Smooth, through-coloured paper and board.
Majestic	FAVINI ITALY Pearlescent and metallic paper for premium communication.
Crush	FAVINI ITALY Distinctive paper with recycled fibre and organic residues.

3. Important website changes still pending

These corrections remain necessary before the website is considered launch-ready.

Priority A - Product pages

- Make the product or family name the main H1 instead of repeating 'Bring Your Creativity to Life'.
- Add a clear overview explaining what the paper is and why a customer should select it.
- Show brand, series, GSM, sizes, colours, SKU and current stock-enquiry action.
- Add verified printing compatibility, finishing suitability, primary applications and secondary applications.
- Add FSC, recycled content, biodegradability and recyclability only according to the verified master data.
- Add Request Sample, Check Stock and Get Price actions on every family page.
- Replace all 'Photo coming soon' placeholders with clean 500 x 500 paper texture images.
- Change labels such as '10 Product' to '10 shades', '2 variants' or the grammatically correct product count.
- Remove internal database language such as references to fields, profiles or SKU-level technical notes.

Priority B - Sustainability page

- Simplify the page around three messages: Mahaveer Papers is FSC-certified; paper is biodegradable and recyclable; supplied papers meet high environmental standards.
- Avoid long explanations about forestry, carbon sinks and the circular economy in the opening section.
- Correct the exception wording: NT Matt and Paperlike Synthetic are non-biodegradable but recyclable.
- Do not state that every product carries FSC certification. Display certification at individual product level.

Priority C - Homepage and About

- Correct the visible '0' counters above experience and office statistics.
- Reduce duplicate About content between the homepage and About page.
- Change the About H1 from 'Industries that trust us' to 'Helping Ideas Find the Right Paper Since 1992' or 'Three Decades of Speciality-Paper Expertise'.
- Replace production-floor imagery that can suggest Mahaveer is a manufacturer with stock, swatches, warehouse, applications or customer-consultation imagery.
- Add a concise Why Mahaveer section: since 1992, curated global ranges, ready stock, technical guidance, samples, Bengaluru and Ahmedabad support.

Priority D - DigiLux

- Replace 'over 10+ specialty products' with '55 SKUs' or 'more than 10 product categories'.
- Clarify 13 x 19 inch size, low MOQ and standard pack quantity.
- Mention toner-based digital printing; tested on Canon and used across Canon, Konica Minolta, Ricoh and Xerox machines.
- State that HP Indigo is not recommended and a trial is required for unverified machines.
- Add a DigiLux sample-pack enquiry action.

Priority E - Blog and contact

- Publish at least three complete articles or temporarily remove Blog from the main navigation. Do not show nine outdated 'Coming soon' posts.

- Add an H1 to the Contact page.
- Use sales@mahaveerpapers.com as the primary enquiry email; keep other addresses only where operationally necessary.
- Retain the working WhatsApp, office and Google Maps links.

4. Essential SEO recommendations

- Create unique titles and descriptions for every product family, including product name, brand, speciality-paper category and Mahaveer Papers.
- Use product-specific H1 headings such as 'Burano by Favini'.
- Add Open Graph images so shared links display a premium branded preview.
- Add Product, Breadcrumb, Organization and LocalBusiness structured data.
- Add descriptive image alt text using the paper name, colour, texture and application where relevant.
- Confirm all canonical links use the final mahaveerpapers.com domain before launch.
- Create clean URLs for catalogue, brand and application filters.
- Link Favini homepage mentions directly to Favini-filtered products.
- Keep spelling consistent: speciality, colour and Bengaluru.

5. Final implementation order

Priority	Action
1	Complete product-page information and data presentation
2	Simplify and correct Sustainability messaging
3	Add the compact Favini homepage section
4	Add Brand filter and Favini labels in Products
5	Fix counters, placeholder imagery, grammar and internal wording
6	Polish DigiLux details and sample-pack action
7	Publish real blog content or hide Blog temporarily
8	Complete metadata, Open Graph images and structured data

The intended result

The website should present Mahaveer Papers as the speciality-paper expert and trusted local supplier. Favini should strengthen the premium portfolio on the homepage and inside Products, while the remainder of the site stays simple, accurate and commercially useful.
